

6. CONSULTATION AND COORDINATION

6.1 INTRODUCTION

An EIS must be prepared when a federal government agency considers approving an action within its jurisdiction that may significantly impact the human environment. An EIS aids federal officials in making decisions by presenting information on the physical, biological, and social environment of a proposed project and its alternatives. The first steps in preparing an EIS are to determine the scope of the project, the range of action alternatives, and the impacts to be included in the document.

CEQ regulations (40 CFR Parts 1500–1508) require an early scoping process to determine the issues related to the Proposed Action and Alternatives that the EIS should address. The purpose of the scoping process is to identify important issues, concerns, and potential impacts that require analysis in the EIS and to eliminate insignificant issues and alternatives from detailed analysis.

This EIS was prepared by the BLM RFO in Rawlins, Wyoming. A third-party contractor was used by the BLM to conduct studies, gather data, and prepare documents. Cooperating agencies for the CD-C project include the State of Wyoming, Carbon County, the Little Snake River Conservation District, Sweetwater County, the Sweetwater County Conservation District, and the Town of Wamsutter.

6.2 PUBLIC PARTICIPATION

The scoping process for this project is described in detail in Section 1.9, Public Participation, beginning on page 1-13 of this EIS.

During preparation of the EIS, the BLM and the consultant IDT have communicated with, and received or solicited input from, cooperating agencies; other federal, state, county, and local agencies; elected representatives; environmental and citizen groups; industry representatives; and individuals potentially concerned with issues regarding the Proposed Action. The contacts made are summarized in the following sections. The following organizations/individuals either provided comment or were provided the opportunity to comment during the scoping period.
